Electronic Roll Measurement Systems

PRO-MIC PRO-WIN Data Logger Software Package

This Microsoft Window's software package runs from a customer supplied personal computer and communicates with the PRO-MIC or PRO-FILER to transfer, display, format and save PRO-MIC measurement data. The measurement data includes distance traveled along the roll body and change in diameter.

This information can then be imported by a separate program through an ASCII file or the Window's Clipboard.

See Technical Note TN-003 for additional PRO-FILER information.

The program will:

o   read data stored in PRO-MIC, PRO-FILER or PDL Data Logger

o   display profile on screen including Roll Model Shape Analysis.

o   print profile to Window's Printer

o   convert to ASCII format and save to disk.

o   erase files in PRO-FILER or PRO-MIC

o   command line parameters control specifics of program operation for integration into a customer designed application.

o   request a copy of the PRO-WIN operating instructions for additional details

o   includes W3A(W3B for Digital) cable for Charger/Interface to PC connection, software on disc and instructions.
