

PRO-MIC

PRO-MIC Roll Measurement Systems

Reliability, Repeatability and 3 Button Operation

PRO-MIC Bluetooth Wireless Electronics

PRO-MIC Wireless Electronics Option:

The PRO-MIC Bluetooth Wireless Electronics upgrade modifies the PRO-MIC electronics to provide wireless communication directly between the PRO-MIC and your PC running PRO-MIC Quantum PC software.

Download PRO-MIC data directly from your PRO-MIC to your PC while measuring a roll in a roll grinder or in-place in your mill or processing line.

This option is extremely useful for field data collection in difficult locations.

Works with Desktop, Laptop or Tablet computers.

Additional Details:

Requires PRO-MIC Digital Electronics.

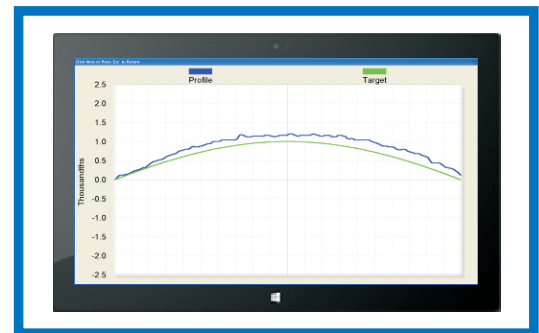

USB Bluetooth Adapter included for use at your PC.

Standard equipment communicates up to 100 meters, optional boosted antennas up to 1000 meters.

Please contact PRO-MIC at 1-800-PRO-MIC-1 or info@pro-mic.com with any questions.
